Table of contents I

- 1 Please Read Me
- 2 Purpose
- 3 Labor classification of the population
- 4 Labor market indicators
- 5 Labor demand
- 6 Wages
- 7 Labor regulation
- 8 Acknowledgments

- Check the message **Welcome greeting** published in the News Bulletin Board.
- Dear student please edit your profile uploading a photo where your face is clearly visible.
- The purpose of the virtual meetings is to answer questions and not to make a summary of the study material.
- If you want to participate, please fill out the following survey: Primer corte 30% > Learning Activities > Tu opinión sobre la economía colombiana
- This presentation is based on (**Cardenas 2020, chap. 9**)

Examine the evolution and characteristics of the supply and demand of labor in Colombia

- To understand the indicators of the labor market from an economic perspective, it is necessary to classify the population from a labor point of view. Initially, the total population of a territory could be included but in practice the **Total Population (TP)** that is included **doesn't** cover (Husmanns, Mehran, and Varmā 1990, chap. 2):
 - Members of the armed forces because this information is considered secret or because it is not easy to obtain information when its members are in barracks and military areas.
 - Residents in institutions such as people who are not part of the military forces but reside in military facilities, residents of penal or correctional centers and hospital residents.
- In that sense, the **Total Population (TP)** covers the non-institutional civilian population residing in households.

Period: May 2024

Figure 1: Labor classification of the population in Colombia

- **Percentage of the working age population** (“Porcentaje de población en edad de trabajar”)
 - $\%WAP = \frac{WAP}{PT} \times 100$
- **Labor participation rate (LPR)** (“Tasa global de participación”)
 - $LPR = \frac{LF}{WAP} \times 100$

- **Employment rate (ER)** (“Tasa de ocupación”)
 - $ER = \frac{E}{WAP} \times 100$
- **Unemployment rate (UR)** (“Tasa de desempleo”)
 - $UR = \frac{U}{LF} \times 100$
- **Underemployment (UER)** (“Tasa de subempleo”)
 - $UER = \frac{UE}{LF} \times 100$

UR code WDI: SL.UEM.TOTL.ZS

UR units: percent

ER code WDI: SL.EMP.TOTL.SP.ZS

ER units: percent

Observation: ILO estimations where ages 15 and older are considered the WAP

Last update date: 2025-01-28**Figure 2:** Annual Unemployment rate (UR) and Employment rate (ER) in Colombia

- The labor demand is the process by which the economy generates job vacancies
- How companies decide how many workers to contract?
 - Demand of the products that offer by the company
 - Wages (the price of labor)
 - Labor regulation
 - The costs of other inputs different form labor and used in production
 - The technology used by companies

In times of low economic growth, companies reduce production and therefore hire fewer workers

Period: 1960 – 2023

Figure 3: Economic growth vs unemployment rate

Figure 4: Employed population according to last educational degree obtained and income bracket

Figure 5: Employed population according to last educational degree obtained and income bracket

Figure 6: Employed population according to last educational degree obtained and income bracket

Figure 7: Employed population according to last educational degree obtained and income bracket

- Mincer equation

- $\log_e(w_{it}) = \log_e(w_o) + \beta_1 Ed_{it} + \beta_2 Ex_{it} + \beta_2 Ex_{it}^2 + \epsilon_{it}$
 - $\log_e$: natural logarithm
 - w_{it} : wage of individual i in period t
 - w_o : wage without any level of education an experience
 - Ed_{it} : years of education of individual i in period t
 - Ex_{it} : potential experience of individual i in period t which is equal to the age minus the years of education minus six
 - ϵ_{it} : are other components of individual i in period t that might affect the wage

- The labor regulation refers to:
 - The laws governing labor contracts
 - Laws governing labor relations that empower unions to represent workers collectively
 - Social security laws governing the response to social needs such as unemployment, maternity, old age, disability, death and sickness

- Resources

- **Calculadora Laboral - Mintrabajo**
